While including functions appreciated in the conventional model such as DRS and CineGamma, the AK-HC5000 Series adds new features such as focus assist, flash band compensation, and skew reduction which is realized through high-speed readout from the MOS sensor. There are additional functions to improve shooting experience including enhanced shockless gain (-3 dB to 36 dB), a user gamma function, black gamma correction according to the pedestal setting, multi-step DNR and easy matrix adjustment.</p> <p>AK-HC5000 Series achieves excellent image quality and operability. When used with AK-UCU500 Camera Control Unit, it is capable of 1080/60p, 240p image output and high-image-quality uncompressed long-distance transmission. The AK-HRP1000/HRP1005 Remote Operation Panel equipped with a color LCD to provide visibility of the display for smooth control. The camera and camera control unit can be connected for approximately 2,000-meter long-distance transmission of video signals when power is supplied from the camera control unit. The remote operation panel and the camera can be connected using dedicated cable. In addition, there is a plan to support IP connection using LAN-cable. The AK-HVF100 9-inches (230 mm) LCD color view finder has also been newly developed equipped with a large display and diverse functions such as focus assist. Overall, this system offers superior cost performance with respect to both operability and ease of use.</p> <ul style="list-style-type: none"> • Sensitivity F11 (2000 lx) and an excellent S/N ratio of 60 dB • Supported Format (from Camera) <p>HD: 1080/59.94p, 50p, 59.94i, 50i, 29.97PsF, 25PsF, 23.98p over 59.94i</p> <ul style="list-style-type: none"> • Equipped with a CAC (Chromatic Aberration Compensation) function capable of correcting even slight chromatic aberration at the lens periphery^{*1} • The DRS (Dynamic Range Stretch) function suppresses blocked shadows and 	€ 29 300

		RobyHead D1 is a classic Pan/Tilt solution for professional broadcasting, as well as for stationary use in studios, theatres, conference halls and stadiums. The head is specially designed to work with 4K cameras providing 4x3G SDI, 12G SDI and 2xFiber connections for the camera signals. The most typical payload for the head would be a box-size camera, but it has enough power to carry studio cameras and has connections for a prompter at the front. The head has a rigid and stylish carbon-fibre body and provides smooth and precise movements. An integrated power supply simplifies camera connections.
